

QGIS Application - Bug report #12461
Unable to commit date changes to MSSQL table in 2.8.1 Wien

2015-03-25 10:49 PM - Michael Hakkennes

Status:	Closed	
Priority:	Severe/Regression	
Assignee:		
Category:	Data Provider/MSSQL	
Affected QGIS version:	2.8.1	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 20616
Description		
<p>Have entered a date as an attribute in "yyyy-mm-dd" format which is accepted in the feature attributes window but when saving layer edits back to MSSQL table the error message, "Could not commit changes to layer" appears.</p> <p>I am able to save date edits to the same MSSQL table in version 2.6.1.</p>

is the date entered manually or with an edit widget? it makes any difference using the widget or not?

#2 - 2015-03-26 09:08 PM - Michael Hakkennes

When a field is set to a "Text edit" edit widget a date is able to be typed in, but changes do not commit to MSSQL. In previous versions (2.6.1) it was possible to type in a date in a text edit widget and save changes.

When a field is set to a "Date/Time" edit widget a date is able to be selected and changes are able to be saved to MSSQL. However if null values are allowed, I am unable to start typing in a date, first a date must be selected and then typed to override the date.

- Priority changed from Normal to Severe/Regression

don't know much about date in ms sql server, anyway I'll tag this as a regression at least until someone that knows better qgis support for mssql can jump in.
