QGIS Application - Bug report #12473
$area malfunctioning

2015-03-29 08:07 PM - mara Gittleman

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Vectors		
Affected QGIS version:	2.8.1	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	duplicate
Crashes QGIS or corrupts data:		**Copied to github as #:**	20621

Description

Calculating area using field calculator results in faulty numbers. Calculating area using Vector --> Geometry Tools --> Export/Add Geometry Columns works.

I'm on a mac, using 2.8.1.

Attached is an example. gardenArea was calculated using field calculator, area was calculated using Export/Add Geometry Columns. Also not sure why it's an integer and not float.
