Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 20626
Description		
<p>When adding a PostGIS layer with a mixed case name, the following error is reported in the log window:</p> <p>Erroneous query: SELECT st_estimatedextent('loader','AnagraficaStrade','geom') returned 7 [ERROR: relation "loader.anagraficastrade" does not exist]</p> <p>Passing st_estimatedextent a double-quoted table name works: SELECT st_estimatedextent('loader','"AnagraficaStrade"', 'geom').</p> <p>After signaling this to the postgis tracker (http://trac.osgeo.org/postgis/ticket/3093), it turns out that this behaviour isn't going to change.</p>

Revert "use triple quoting with st_estimatedextent in postgres provider and db_manager (fixes #12478)"

As it seems to address a meanwhile reverted behavior change in PostGIS 2.1 before it was released (see also <https://trac.osgeo.org/postgis/ticket/2834>).

This reverts commit 048aff01bb9cf42e2c1c17eb0ddbd81537443e19.
