QGIS Application - Bug report #12489 QGIS 2.8.1 32-bit cannot import pyodbc

2015-04-01 09:31 AM - Chris George

Status: Closed Priority: Normal

Assignee:

Category: Build/Install

Affected QGIS version:2.8.1 Regression?: No Operating System: Easy fix?: No

Pull Request or Patch shapplied: Resolution: up/downstream

Crashes QGIS or corrupts data: Copied to github as #: 20636

Description

If you open the Python console and issue the command 'import pyodbc' then first you get a Visual C++ error R6034, 'An application has made an attempt to load the C runtime library incorrectly', then you get the message

Traceback (most recent call last):

File "<input>", line 1, in <module>

File "C:/PROGRA~1/QGISWI~1/apps/qgis/./python\\qgis\\utils.py", line 478, in _import

mod = _builtin_import(name, globals, locals, fromlist, level)

ImportError: DLL load failed: A dynamic link library (DLL) initialization routine failed.

I am told this does not happen in the 64-bit version. It does not happen in the 32-bit version 2.6.1.
