|---|----------------|---------------------------------------|
| Status: | Closed | |
| Priority: | High | |
| Assignee: | | |
| Category: | PyQGIS Console | |
| Affected QGIS version: | master | Regression?: No |
| Operating System: | | Easy fix?: No |
| Pull Request or Patch supplied: | No | Resolution: no timely feedback |
| Crashes QGIS or corrupts data: | Yes | Copied to github as #: 20644 |
| Description | | |
| Step to reproduce: <ul style="list-style-type: none">- open python console- start writing a line so that the auto completion menu opens- without choosing any entry undock the python console (the auto completion menu is still open)- left click into the console leads QGIS to crash. | | |

Does not seem to be an easy fix.

I think it boils down to this upstream bug report:

<https://bugreports.qt.io/browse/QTBUG-22605>

Removing `Qt::WA_StaticContents` should resolve the crash, but as far as I can see, this flag is set internally by QScintilla we don't actually use it a lot in QGIS.

The upstream report mentions that "the crash is no longer reproducible" without more details, so we can only assume that it has been resolved in Qt in some release of the 5-series...

Apparently not... QGIS with Qt 5.6 crashes as well.

#4 - 2017-03-06 04:46 PM - Giovanni Manghi

- Target version set to Version 3.0

- Affected QGIS version changed from 2.8.1 to master

#5 - 2017-05-01 01:07 AM - Giovanni Manghi

- Regression? set to No

- Easy fix? set to No

#6 - 2018-11-08 01:28 PM - Giovanni Manghi

- *Status changed from Open to Feedback*

Please try on QGIS 3.4.1, if the issue is still valid change the affected version, thanks.

#7 - 2019-02-11 04:22 AM - Nyal Dawson

- *Resolution set to no timely feedback*

- *Description updated*

- *Status changed from Feedback to Closed*
