QGIS Application - Bug report #12544
WFS client do not download anymore some layers

2015-04-10 04:01 AM - Giovanni Manghi

Status:	Closed			
Priority:	Severe/Regression			
Assignee:				
Category:	Web Services clients/WFS			
Affected QGIS version:	master	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	invalid
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	20686

Description

From:

http://www.fao.org/figis/geoserver/area/ows?version=1.0.0&typeName=area:FAO_AREAS_INLAND

two out of three layers are downloaded completely empty.

It used to work with no issues on QGIS 1.8. Since 2.* there is this issue.

History

#1 - 2015-04-11 03:46 PM - Maximilian Krambach

When using it without "typeName=area:FAO_AREAS_INLAND" all three layers load fine. Seems that this part isn't really a part of th WFS address.

#2 - 2015-04-13 01:11 AM - Giovanni Manghi

- Resolution set to invalid

- Status changed from Open to Closed

right, sorry I tested the URL as it was sent to me and have not looked at it with attention.
