

QGIS Application - Bug report #1259

GeoTIFF not visible though present in the project

2008-08-30 06:39 AM - Maciej Sieczka -

Status: Closed	
Priority: Low	
Assignee: nobody -	
Category: Rasters	
Affected QGIS version:	Regression?: No
Operating System: All	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 11319
Description	
Try the attached sample data.	
1. Edit the qgs file so that it at your map.tif where it's stored on your system.	
2. Load the project.	
3. The TIFF is present on the layer's list, but it's missing from the display.	
When I was creating the project, the raster was visible. It "disappeared" after I saved and reloaded the project.	

History

#1 - 2008-09-01 11:30 AM - ersts -

- Resolution set to fixed

- Status changed from Open to Closed

Any project saved after commit:bbe9e605 (SVN r9199) can be fixed by replacing the following string,

UNDEFINED_DRAWING_STYLE

with

PALETTED_COLOR

#2 - 2009-08-22 12:57 AM - Anonymous

Milestone Version 1.0.0 deleted
