QGIS Application - Bug report #12621
Rule-based Layer Style: min. scale / max. scale columns interchanged when typing in values

2015-04-21 08:02 AM - Clemens Weise

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Browser			
Affected QGIS version:	2.8.1		**Regression?:**	No
Operating System:	Windows 8.1		**Easy fix?:**	No
Pull Request or Patch supplied:	No		**Resolution:**	fixed/implemented
Crashes QGIS or corrupts data:	No		**Copied to github as #:**	20738

Description

When manually changing min. scale / max. scale values in rule-based Layer Styling, (double-click on field), the opposite value is changed instead of the proper one. Example:

Double-click on **Min. scale** field, entering value "1000", the value will be registered for the **Max. scale** field. (And vice versa).

History

#1 - 2015-04-21 12:02 PM - Nyall Dawson

- Resolution set to fixed/implemented

- Status changed from Open to Closed

Already fixed in master and back ported to 2.8
