

QGIS Application - Bug report #12644

A number of fonts in the composer have metrics messed up upon project re-loading

2015-04-25 12:07 AM - Mathieu Pellerin - nIRV

Status:	Closed	
Priority:	High	
Assignee:	Nyall Dawson	
Category:	Map Composer/Printing	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 20757
Description		
<p>This is a real bummer. With a number of fonts (for e.g. Delicious, http://www.exljbris.com/delicious.html), bold metrics get messed up when opening a composer from a saved project. All the characters are over-bold. It's quite serious as it also affects the export to image.</p> <p>Steps to reproduce</p> <ol style="list-style-type: none">1. Install the Delicious font (it's free and available here: http://www.exljbris.com/delicious.html)2. Launch QGIS, and create a new composer from the blank project3. Add a label item, and set its font family to "Delicious Smallcaps" with a size value of 484. Enter a random string in the label, and notice its style5. Save the project with the above-created composer6. Exit QGIS7. Re-launch QGIS, and open the saved project8. Open the composer, and notice how the label item font boldness is all wrong (see attached screenshot comparison)		

Associated revisions

Revision 7a3a857d - 2015-06-15 11:40 AM - Nyall Dawson

Add QgsFontUtils methods for saving/loading font from XML (fix #12644)

Fixes loss of font styles when restoring projects. Credit to @nirvn for the initial implementation.
