

QGIS Application - Bug report #12674

Add Oracle Spatial Layer

2015-04-30 05:41 AM - Rene Mueller

Status:	Closed		
Priority:	Normal		
Assignee:	Jürgen Fischer		
Category:	Data Provider/Oracle		
Affected QGIS version:	2.8.1	Regression?:	No
Operating System:	Windows	Easy fix?:	No
Pull Request or Patch supplied:	No	Resolution:	
Crashes QGIS or corrupts data:	No	Copied to github as #:	20781
Description			
After entering the details for the oracle connection and testing it successfully, all the tables of the database are greyed out and can not be added to the display (Screen1). If I open a QGIS 2.6 project, I can add oracle spatial layers from the browser (Screen2). As soon as I save the project with version 2.8, Oracle tables can not be added anymore.

History

#1 - 2015-05-07 02:01 AM - Giovanni Manghi

- Status changed from Open to Feedback

does this happen only when opening/saving existing projects created in 2.6 or also in new projects? does it affects both the browser and the "add oracle layer" dialog?

#2 - 2015-05-07 03:46 PM - Jürgen Fischer

- Status changed from Feedback to Closed

Fixed in changeset commit:"656af530c3fa9353e35a812f880350e01f37ebc0".
