

QGIS Application - Feature request #12687

save custom functions in project file

2015-05-03 03:46 PM - Jesse McMillan

Status:	Open	Resolution: Copied to github as #: 20793
Priority:	Normal	
Assignee:		
Category:	Unknown	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>I use the function builder tab in the expression string builder to get the current document path using a python string. This works well, but the functions appear to be saved in the local qgis install instead of the project file. I use dropbox to sync the file to multiple computers/users and have to manually update the functions on each computer each time I make a change. If the functions were saved in the project file the portability would be better.</p>
