

QGIS Application - Bug report #12694

Incorrect reading of OziExplorer .map raster projection file

2015-05-04 11:01 AM - David Mancini

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Rasters	
Affected QGIS version:	2.8.1	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 20800

Description

In our office we were loading a .png raster image that had an associated .JPR and .map georeferencing files. When loading this layer in QGIS Desktop 2.8.1 the image appears to land down near the equator in the incorrect position. When testing the exact same set of .png, .JPR and .map file using QGIS 2.6.0 the raster image is placed in it's real world coordinates. I've copied the output in the metadata from each version of QGIS for your comparison. I've also attached a copy of the raster files for your review.

Cheers!

David Mancini

QGIS 2.8.0

Driver

GDAL provider
