Description

Hi,

i added this action on my layer

```
bash -c "echo \"\">%area %codice\" >> /home/geko/species_localities.txt"
```

If i identify a feature on the map and the press the cog icon to run it, i got this line in the file:

```
%area %codice
```

No problem running action from the attribute table, where the output is this:

```
177183 0
```

I am using current 0.8 snapshot

History

#1 - 2006-06-01 03:33 AM - Gavin Macaulay -

- Resolution set to fixed

- Status changed from Open to Closed

Fixed in SVN commit:0f11f905 (SVN r5502)

#2 - 2009-08-22 12:46 AM - Anonymous

Milestone Version 0.8 deleted
