Description

In r9245 all Python plugins refuse to load with an error:

Nie można wczytać wtyczkifTools due an error when calling its initGui() method

In r9243 it was all ok.

Full error output:

Nie można wczytać wtyczkigeoprocessing due an error when calling its initGui() method

Cosmetic issue - there should be a space between words "wtyczki" and the plugin name ("fTools" in this case).

History

#1 - 2008-09-02 09:14 AM - Jürgen Fischer

- Resolution set to invalid

- Status changed from Open to Closed

the plugins need to be updated for the new API. what used to be named getMainWindow() is now called mainWindow().
