

QGIS Application - Feature request #12707

Avoid too similar colours in the same project

2015-05-06 09:20 AM - Paolo Cavallini

Status:	Open	Resolution: Copied to github as #: 20813
Priority:	Normal	
Assignee:	Nyall Dawson	
Category:	Symbology	
Pull Request or Patch supplied:	Yes	
Easy fix?:	No	
Description		
<p>When loading layers a random colour is assigned to each. Quite often it happens that the colours are rather similar, thus confusing the user. I have the impression that this happens more often in 2.8 compared to previous versions.</p> <p>It would be good if QGIS could check the colours already used in the project, and select something different enough for the next layer.</p>		

History

#1 - 2017-05-01 12:47 AM - Giovanni Manghi

- *Easy fix? set to No*

#2 - 2018-03-06 06:44 PM - Paolo Cavallini

- *Assignee set to Nyall Dawson*
- *Status changed from Open to Feedback*
- *Description updated*

A solution has been proposed, possibly implemented in QGIS 3.x.

#3 - 2018-03-07 06:50 AM - Nyall Dawson

- *Pull Request or Patch supplied changed from No to Yes*
- *Status changed from Feedback to Open*

Still work in progress- a PR is open here <https://github.com/qgis/QGIS/pull/6265>, but some bits left to do
