QGIS Application - Feature request \#12707
Avoid too similar colours in the same project
2015-05-06 09:20 AM - Paolo Cavallini

| Easy fix?: |  |  |
| Description |  |  |
| When loading layers a random colour is assigned to each. Quite often it happens that the colours are rather similar, thus confusing the |  |  |
| user. I have the impression that this happens more often in 2.8 compared to previous versions. |  |  |
| It would be good if QGIS could check the colours already used in the project, and select something different enough for the next layer. |  |  |

## History

\#1-2017-05-01 12:47 AM - Giovanni Manghi

- Easy fix? set to No

## \#2-2018-03-06 06:44 PM - Paolo Cavallini

- Assignee set to Nyall Dawson
- Status changed from Open to Feedback
- Description updated

A solution has been proposed, possibly implemented in QGIS 3.x.

## \#3-2018-03-07 06:50 AM - Nyall Dawson

- Pull Request or Patch supplied changed from No to Yes
- Status changed from Feedback to Open
