Status: Closed Priority: Normal

Assignee:

Category: Build/Install

Affected QGIS version:2.8.1

Operating System: Arch Linux

Pull Request or Patch supplied:

Crashes QGIS or corrupts data:

Regression?: No

Easy fix?: No

Resolution: invalid

Copied to github as #: 20814

Description

Hi,

After a successful installation on archlinux - QGIS can't find libqwt.so.6

qgis: error while loading shared libraries: libqwt.so.6: cannot open shared object file: No such file or directory

on Arch, despite passing

-DQWT_LIBRARY=/usr/lib/qwt/libqwt.so

(https://aur.archlinux.org/packages/qg/qgis/PKGBUILD)

It's still searching for libqwt.so.6 somewhere else.

I managed to solve it manually thank to this post:

http://elza.me/blog/2015-04-15-QGIS.html

(# In -s /usr/lib/qwt/libqwt.so.6.1.2 /usr/lib/libqwt.so.6)

History

#1 - 2015-05-09 01:34 PM - Jürgen Fischer

- Resolution set to invalid
- Status changed from Open to Closed

set LD_LIBRARY_PATH to /usr/lib/qwt or add it to /etc/ld.config and run ldconfig.
