

QGIS Application - Bug report #12725

GRASS datasources always have absolute paths in QGIS project

2015-05-09 01:34 AM - Joeri Theelen

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Project Loading/Saving	
Affected QGIS version:	2.8.1	Regression?: No
Operating System:	MS Windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 20826
Description		
<p>I've noticed that in a QGIS project with "Save paths" set to "relative", datasources are still absolute for GRASS datasets. After editing the QGIS project file making the absolute paths relative, the QGIS project remains valid with regard to the GRASS datasets (the relative paths are resolved and the GRASS datasets are found). But the next QGIS project save, these GRASS dataset paths are turned absolute again. This is annoying. Please fix this.</p>
