Description

using the GRASS r.drain module I'm getting (master and 2.8.2, Windows and Linux) the following python error that does not seems specific to the GRASS backend, but also I'm not able (at the moment) to trigger it within other modules. The error show regardless the CRS of the layers used. It was not an issue until 2.4.

    Traceback (most recent call last):
      File "C:/OSGeo4W/apps/qgis/./python/plugins\\processing\\gui\\AlgorithmDialog.py", line 148, in accept
        if checkCRS and not self.alg.checkInputCRS():
      File "C:/OSGeo4W/apps/qgis/./python/plugins\\processing\\core\\GeoAlgorithm.py", line 410, in checkInputCRS
        crs = dataobjects.getObject(item).crs()
    AttributeError: 'NoneType' object has no attribute 'crs'

Are we sure this is a blocker?

#3 - 2015-06-11 07:14 AM - Giovanni Manghi

- Target version changed from Version 2.10 to Future Release - High Priority

a blocker is by definition a regression, and this is a regression. It was also my understanding that this does not means anymore that it should actually block a release.

In this case, better rename the category (a blocker that does not block does not make much sense, right?).

:)

this is not my call, I just try keep the tracker clean regardless how the tickets are classified.

I am unable to replicate - could you please provide a simple test project?

#7 - 2015-06-19 01:07 AM - Martin Dobias

- Status changed from Open to Feedback

#8 - 2015-06-19 03:49 AM - Giovanni Manghi

- Resolution set to not reproducable

- Status changed from Feedback to Closed

I also cannot replicate it anymore.
