

## QGIS Application - Bug report #12750

### Labelling: replace a space with return conflicts with Return within a string

2015-05-14 09:52 AM - Paolo Cavallini

<b>Status:</b> Closed	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Category:</b> Labelling	
<b>Affected QGIS version:</b> 2.8.2	<b>Regression?:</b> No
<b>Operating System:</b>	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	<b>Copied to github as #:</b> 20849
<b>Description</b>	
Return within a string and the option to replace a character (typically space) with return do not interact nicely (the return within a string not being used).	
More details:	
<ul style="list-style-type: none"><li>- if the return and the wrap character are in the same string, the return is not taken into account, it becomes a simple space;</li><li>- if the wrap character appears before the return, even in a separate string, the return is not taken into account, it becomes a simple space.</li><li>- Only returns written before a wrap character, in a separate string, are applied.</li></ul>	
Thanks DelazJ.
