

QGIS Application - Bug report #12766

modeller: number used to define a default for a parameter (from a list) is ignored

2015-05-18 08:38 AM - Paolo Cavallini

Status: Closed	
Priority: Normal	
Assignee: Victor Olaya	
Category: Processing/Modeller	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution:
Crashes QGIS or corrupts data:	Copied to github as #: 20865
Description	
The default method for saga:slope,aspect etc is 6, whereas the same alg when used in a model has a default of 0. This is obviously confusing for the users.
