

QGIS Application - Feature request #12776

Attribute table undo button

2015-05-19 09:05 AM - Andre Duarte Duarte

Status:	Open	Resolution: Copied to github as #: 20875
Priority:	Normal	
Assignee:		
Category:	Attribute table	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
Undo button in the menu of the attribute table increase productivity. Filling some avoid errors. Is possible to add the button?

Create a Undo Button in the menu of the attribute table:

Problem:

When you fill a column with a lot of value or a single value sometimes we do will wrong value, with this kind of button we can undo the wrong filling value or get the previous value.

How work:

similar to the undo button when you adding a new shape in the spatial information but an icon in the attribute table (additional bonus: redo button perhaps?).

Advantage:

Increase the productivity insertion in a single click?

Disadvantage:

can be difficult implement? Hard time consuming? Not necessary feature or high priority?

Workarounds:

backspace and write again or exist another?

Regards

João
