Pull Request or Patch supplied:	Not supplied	
Easy fix?:	No	
Description		
I can't find a creation date / last modified on a layer information panel - am I missing something?.		
I thought it would be handy to see this layer file info in general layer info?		
Sometimes I have multiple layers that have similar names and when I want to do a clean out it would be handy to look at this type of info.		
It would also be good to have a button link to the parent folder of the file source.
