Operating System:	Windows	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	not reproducable
Crashes QGIS or corrupts data:		**Copied to github as #:**	20924

Description

When I try to sample color (layer properties) from screen using the space bar it appears to lock my computer to freeze.

- Status changed from Open to Feedback

not the case on master/linux. Windows not tested (yet).

#2 - 2015-05-26 02:09 PM - Saber Razmjooei

Works fine under Windows too.

#3 - 2015-06-17 03:53 PM - James Harvey

I have had this happen again recently. It could just be my Windows computer. I'll try and find out more next time I have it happen.

#4 - 2015-11-10 03:47 AM - Giovanni Manghi

- Resolution set to not reproducable

- Status changed from Feedback to Closed

Closing for lack of feedback. Reopen if necessary.
