<b>Crashes QGIS or corrupts data:</b> No	<b>Copied to github as #:</b> 20941

**Description**

a simple query on a postgis layer : "select \* from cours\_eau" throws this error message:

```
Traceback (most recent call last):
  File "C:\NAS01\appdata2008\haubourg\AppData\Roaming\qgis\python\plugins\db_manager\dlg_sql_window.py", line 172, in executeSql

### History

**#1 - 2015-06-09 01:14 PM - Jürgen Fischer**

- Resolution set to invalid
- Status changed from Open to Closed

third party plugin. Maybe file a ticket [here](#)

**#2 - 2015-06-10 12:14 AM - Regis Haubourg**

Sorry for that, I thought it was in core.  
Cheers
