QGIS Application - Bug report #12859
Qgis layer style file not saving

2015-06-02 06:14 AM - Don Smith

Status:	Closed			
Priority:	Low			
Assignee:				
Category:	Symbology			
Affected QGIS version:	2.8.1		**Regression?:**	No
Operating System:	Windows		**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	duplicate
Crashes QGIS or corrupts data:			**Copied to github as #:**	20952

Description

When in the layer window, choosing
Style -> Save Style -> Qgis layer style file
no longer creates a style file.

Where are you trying to save the qml file? Do you have access write to the folder?

Have you tried it in another platform. It works fine for me.

Just discovered after putting the bug track in that the layer in question was an ODBC generated one. So while the 'bug' is technically still valid, it is also pretty irrelevant except in this obscure case. Besides, it is easily got around by using a shape or other layer file to generate the style file and then apply it to the odbc layer.

what is the format? csv?

#6 - 2015-07-27 04:51 AM - Toni Keskitalo

An older issue shows that you can't save a style file from a CSV layer on Windows. It's still present in 2.10.1: issue #8285.
