

QGIS Application - Feature request #12866

Composer Attribute table : display a long text on several lines

2015-06-03 09:41 AM - Harrissou Santanna

Status: Closed	
Priority: High	
Assignee: Nyall Dawson	
Category: Map Composer/Printing	
Pull Request or Patch supplied:	Resolution: duplicate
Easy fix?: No	Copied to github as #: 20957
Description	
<p>Suppose you have a layer with a field containing long text (say string(200)). You may want to show this attribute table in print composer but due to the width of the field, your table may take all the paper width or more than expected. If you customize a width smaller than the "Automatic" value set by QGIS, the content of the field will be truncated and therefore useless.</p> <p>It would be nice to be able to split the content of this field in several lines, according to the width set by the user.</p>
