

QGIS Application - Bug report #12888

Symbol with data-defined size that evaluate to NULL are drawn

2015-06-05 02:23 AM - Vincent Mora

Status: Closed	
Priority: Normal	
Assignee: Vincent Mora	
Category:	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied: Yes	Resolution:
Crashes QGIS or corrupts data: No	Copied to github as #: 20978
Description	
To allow the preview and the drawing of the symbol with data-defined properties, the property is given a default value when the expression is NULL.	
As a result, for DD size expression, symbols are drawn with the default size when the field is NULL. This gives different results than 2.8.

Revision 4fb22b4e - 2015-06-24 12:08 PM - Vincent Mora

converted size expr evaluate to 0 on NULL field

fix #12888

use coalesce(expr,0) to have zero size if expression evaluates to NULL

otherwise the default size would be used
