

QGIS Application - Bug report #12905

processing: output in formats different from default (shp/tif) do not work

2015-06-08 01:16 AM - Giovanni Manghi

Status:	Closed	
Priority:	High	
Assignee:	Victor Olaya	
Category:	Processing/Core	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 20995
Description		
<p>It seems that recently the ability to save outputs in formats different from the default (shp, tif) is not working as expected, at least on GRASS and SAGA.</p> <p>GRASS raster outputs are always tif regardless of the extension the output can have, while trying outputting a vector in a format different from shp seems to result always in a error.</p> <p>In SAGA it seems that outputting a raster in a format different from tif results always in a error, while for vectors it seems ok, but not 100% sure.</p>
