

QGIS Application - Feature request #12969

Autohide empty groups and sub-groups in "Filtered" Map Composer's legend

2015-06-15 06:29 AM - Alexandre Neto

Status:	Closed	Resolution: Copied to github as #: 21047
Priority:	Normal	
Assignee:		
Category:	Map Composer/Printing	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description While using "Filter legend by map content", at the print composer, it would be nice to also hide the resulting empty groups and sub-groups. In the current implementation, if layers are organized in groups or even if layers symbols are grouped (using rule-base symbols), you will have to manually remove or hide all the empty group and sub-group (layers) names.
