QGIS Application - Bug report #12986
Crash Dump Windows 8.1

2015-06-17 09:05 PM - Luke Taylor

Status:	Closed			
Priority:	High			
Assignee:				
Category:	Symbology			
Affected QGIS version:	2.8.2	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	not reproducable	
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	21064	

Description

Hello, I am repeatable getting the crash dump screen when zooming in or out on a map or when moving the map around o the screen.

After opening a project it doesn't straight away but after a few moves or scrolls.

It has only been happening since upgrading my laptop wit Windows 8.1.

I am running 2.8.2.

Regards,

Luke

Do you have "Render layers in parallel..." ticked in Options -> Rendering?
