**Description**

Serving WFS gets slow when the project file contains a large number of layers (tested with Postgis layers). The issue is present in Qgis Server 2.8.1 and 2.8.2, but not in 2.4 (2.6 not tested). WMS is not affected. Workaround: move some layers to other project files.

# History

**#1 - 2015-10-05 04:37 AM - Jürgen Fischer**

*- Subject changed from slow Qgis Server WFS from big project files to slow WFS response using big project files*

**#2 - 2017-01-05 08:19 AM - Giovanni Manghi**

*- Priority changed from High to Normal*

*- Status changed from Open to Feedback*

Is this still the case in recent qgis releases?

If yes this would configure as a regression.

**#3 - 2017-01-26 03:01 AM - Giovanni Manghi**

*- Resolution set to not reproducable*

*- Status changed from Feedback to Closed*

Closing for lack of feedback.
