

QGIS Application - Feature request #13018

Tools of the print composer - atlas

2015-06-21 02:30 PM - Antonio chianese

Status:	Closed	Resolution: Copied to github as #: 21094
Priority:	Normal	
Assignee:		
Category:	Map Composer/Printing	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
For those who use atlas and wants to print only a record in large data sets, I think it's useful to be able to choose the record of interest using the table of the same generation Atlas		

History

#1 - 2015-06-29 03:23 AM - Hugo Mercier

- Category set to Map Composer/Printing

There is already a feature action called "Set as atlas feature for". When selecting a feature of the coverage layer of a defined atlas, it will turn on the atlas preview and "move" to the atlas page with this feature.

Does it fulfill your need ?
