QGIS Application - Bug report #13022
ELSE expression symbol used when other rules are set invisible in the legend

2015-06-22 02:05 AM - Alexandre Neto

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Symbology			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**		
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	21098	

Description

Using the rule-based symbols with several rules and an ELSE expression, If you, in the map canvas legend, set a rule "layer" to invisible, all it's features will then be represented with the ELSE Symbol.

Not sure if this is the expected behaviour. I would expect that those feature would simply became invisible.

Others, in this qgis-dev mailing list thread [[[0]]], seem to have the same opinion that this might not be the expected behaviour and that it should be fixed.

Additionally, Andreas Neumann suggested that another rule might/should be created allowing the user to have both behaviour [[[1]]], and Mathias Kuhn added some terminology [[[2]]]:

ELSE - invisible exception rule (features that match invisible rules stay invisible)
TRUE ELSE - disabled exception rule - (features that match invisible rules are rendered here)

- Status changed from Open to Feedback

This is fixed in master, isn't it?

#2 - 2015-10-14 03:07 AM - Alexandre Neto

- Status changed from Feedback to Closed

Yes it is.
