do you use ESRI-FileGDB Driver or OpenFileGDB Driver?

- with **ESRI-FileGDB Driver** i can edit features in the actual master
- in qgis 2.8.2 is no **ESRI-FileGDB Driver** available
- in qgis 2.8.2 is only **OpenFileGDB Driver** available (sourcetype=folder);only view data, no editing on this sourcetype is possible

QGIS doesn't contain any GDAL drivers - it depends on what GDAL supports.

- Resolution set to worksforme
- Status changed from Open to Closed

The filegdb driver is optional - on OSGeo4W the driver is available as package gdal-filegdb (see also #12045).
