

QGIS Application - Bug report #13062
DXF Export: problem with some basic shapes

2015-07-02 01:56 AM - Andreas Neumann

Status:	Closed	
Priority:	Normal	
Assignee:	Jürgen Fischer	
Category:	DXF export	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed/implemented
Crashes QGIS or corrupts data:		Copied to github as #: 21132
Description		
<p>For a point symbol data it seems like the following basic shapes are not correctly exported:</p> <ul style="list-style-type: none">- equilateral triangle (no symbol exported in DXF)- triangle (invalid export, triangle not correctly closed, sometimes results in very long artefact lines towards point 0/0)- filled arrowhead: stroke not correctly exported (only fill appears)- star: (no symbol exported in DXF)- regular star: (no symbol exported in DXF)- diamond (sames situation like triangle, see above)- arrow (no symbol exported in DXF)- pentagon (no symbol exported in DXF) <p>See attached a project with a Shapefile where each symbol is used and the resulting DXF with the invalid symbols exported.</p> <p>You can test with the layer "Simple Markers Categorized".</p>
