Easy fix?:	No	**Copied to github as #:** 21173	

Description

When choosing a 'Web view' or 'Photo' field format in the design of a form, the photo is displayed as well as its url/path. This should be optional: it should be possible to display both the photo and its address (like currently), only the photo or only the address (especially when the field is editable of course).
I think that most of the time displaying the url below the photo is useless.

See the discussion about forms and fields here : https://github.com/qgis/QGIS-Enhancement-Proposals/pull/13
