If you press "SET filter" button, while the connection it’s still searching for other databases , then QGIS will freeze.

If you press stop and then you click set filter, it will work.

Also, sometimes it’s takes up to 1 minute to load all the tables, and i just need the last table.
Same problem happens with 2.8.4

I think the problem is with sharing the same connection. Forcing all connections not to be shared fixes this issue.
I'm not sure why sharing is decided at connection construction time.

PR ready for test by original reporter and discussion by other developers: https://github.com/qgis/QGIS/pull/2689
#9 - 2016-01-18 04:49 AM - Sandro Santilli
- Status changed from In Progress to Feedback
- Target version changed from Future Release - High Priority to Version 2.14

Bug should be fixed with commit 4ccb08dbadaca8153f69ddd7ab8b3b79729239b -- please test

#10 - 2016-01-19 12:49 AM - Sandro Santilli
I've added an assert to guard against any other such dangerous use of shared pgsql connections here: https://github.com/qgis/QGIS/pull/2695

#11 - 2016-01-19 12:49 AM - Sandro Santilli
- Affected QGIS version changed from 2.10.0 to 2.8.5

#12 - 2016-01-25 02:35 AM - Sandro Santilli
- Status changed from Feedback to Closed
- Resolution set to fixed/implemented

assuming fixed by commit:4ccb08dbadaca8153f69ddd7ab8b3b79729239b
