

QGIS Application - Bug report #13146

Postgis count not working

2015-07-23 03:09 AM - baditaflorin -

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Map Legend	
Affected QGIS version:	2.8.2	Regression?: No
Operating System:	windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 21209
Description		
postgis count not working for a filtered database, with 2.8M points.		
I only get a 0, and a pg_stat_activity QGIS does not even try to count. \\		
the desired outcome would be to show something , loading, or not implemented, or error		

History

#1 - 2015-07-23 03:10 AM - baditaflorin -

- File postgis_count.PNG added

#2 - 2015-07-30 02:58 PM - Giovanni Manghi

- Status changed from Open to Feedback

- Category set to Map Legend

Where I can get a dataset with that size to allow me do local tests?

thanks

The dataset that i am using it's the osm file for canada.

I think that it was not working because i am using a view to filter and not load everything into QGIS

I will test some more and return with the ticket if needed

a part of the VIEW looks like this

```
-- select * from nodes_view_addresses limit 5
CREATE OR REPLACE VIEW nodes_addresses_view AS
SELECT
  user_id, tstamp, changeset_id, version, nodes.id as node_ids, nodes.geom,users.id as u_ids,users.name as osmname,
FROM nodes,users
```

WHERE ST_GeometryType(geom) = 'ST_Point' AND users.id=nodes.user_id AND ((tags->'addr:housenumber')) is not null
