

QGIS Application - Bug report #13153
.qgs file is blank after save

2015-07-25 11:01 AM - Matthew Xi

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Project Loading/Saving	
Affected QGIS version:	2.8.2	Regression?: No
Operating System:	MacOS X	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: not reproducible
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 21216
Description		
<p>When I save my QGIS project file, all loaded layers disappear and the saved .qgs file on disk is blank. The backup file, *.qgs~, is not blank but does not contain the most recent changes, so some work is not recoverable.</p> <p>The bug has persisted since at least Brighton, when I first noticed it. Wein has not fixed the bug.</p>		

History

#1 - 2015-07-27 12:21 AM - Matthias Kuhn

- Status changed from Open to Feedback
- Is only this project affected?
- Which kind of changes did you do?
- Does the problem persist if you run QGIS without plugins?

#2 - 2015-07-30 01:21 PM - Giovanni Manghi

- Category changed from Browser to Project Loading/Saving

When filing tickets please choose the proper category. Thanks.

#3 - 2015-11-10 03:44 AM - Giovanni Manghi

- Resolution set to not reproducible
- Status changed from Feedback to Closed
