

QGIS Application - Bug report #13154

Feature count doesn't update

2015-07-25 11:25 AM - hossein arshad

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Data Provider/SpatialLite	
Affected QGIS version:	2.10.0	Regression?: No
Operating System:	Ubuntu 14.04 LTS	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: not reproducible
Crashes QGIS or corrupts data:	No	Copied to github as #: 21217
Description		
<p>When I add some items to the vector layer and then delete them then I run a script which looks in the vector layer and if the feature count is 0 it refills it again. but the problem is feature count is showing the previous features even though there is no feature in vector layer.</p>		

History

From the script you have open in the background it looks as if you are adding features directly on the provider, bypassing the layer (Using layer.dataProvider().addFeatures() instead of layer.addFeature() with startEditing() / commitChanges()).

This way you change the data directly on the provider and bypass the internal mechanism to update gui elements (like canvas, attribute table) in sync and metadata like feature count may be wrong.

#2 - 2015-07-30 02:19 PM - Giovanni Manghi

- OS version deleted (2.10.1)
- Operating System deleted (QGIS Pisa)
- Status changed from Open to Feedback

#3 - 2015-11-10 04:29 AM - Giovanni Manghi

- Resolution set to not reproducible
- Status changed from Feedback to Closed

Closing for lack of feedback. Reopen if necessary.
