| Description  |                       |   |
| <p>At the moment, resizing a map frame in printcomposer changes the scale of the map, even if its manually set.</p> <p>Usually I like my manually set scale and just want to adapt the map frame. Resetting the scale everytime I change the mapframe a little bit is very tedious. I would really love to see a checkbox, maybe beneath the "Scale" box or "Lock layers for map item" box, to lock the map scale.</p> |                       |   |

History

#1 - 2015-08-21 12:07 PM - Anita Graser

- Target version set to Future Release - Lower Priority
- File Screenshot\_2015-08-21\_21.05.59.png added

You can lock the scale by using a data-defined override as shown in the attached screenshot. A "lock" button would be more user friendly though.

#2 - 2017-05-01 12:47 AM - Giovanni Manghi

- Easy fix? set to No
