

QGIS Application - Feature request #13178

QGIS LTR version checks for latest non-LTR QGIS version

2015-08-03 08:16 AM - Richard Duivenvoorde

Status:	Open	Resolution: Copied to github as #: 21240
Priority:	Normal	
Assignee:		
Category:	Unknown	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
See this thread: https://lists.osgeo.org/pipermail/qgis-developer/2015-August/038715.html		
Currently when you use the menu item: Help/Check QGIS Version in current LTR version 2.8.3, it reports back that 2.10.1 is the latest version, and the users is urged to download that: http://qgis.org/version.txt		
It would be better if the LTR version checks for a version.ltr.txt.		
Feature Request: Another outcome of the discussion is that maybe QGIS should check it's latest version every now and then and report to the user if there is newer (either LTR or stable) version available. It should not become a 'nag-screen' though...
