

QGIS Application - Bug report #13202

Data (Mapinfo?) related QGIS crash when saving project (NOT in qgis 1.8 though)

2015-08-10 10:47 AM - Richard Duivenvoorde

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:		
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 21263
Description		
<p>Funny issue: loading (attached) mapinfo data in current QGIS: ok. Save the project: crash!</p> <p>Then compiled QGIS 1.8: loading and saving/reloading the project: OK</p> <p>Then loading this 1.8 project in master, and try to save: crash! leaving me with an empty project file...</p> <p>After every crash the project file is empty.</p> <p>Note that loading the file is ok: you can see and style it, there is a crash when you save the project.</p> <p>Tried to save the data as shapefile but then the shapefile makes QGIS crash!</p> <p>With me on Debian self compiled master and 1.8 here... could be OGR related, or just wrong data, but maybe it is just me.</p> <p>Would be nicer if we sent an error instead of instant crash, even with faulty data.</p> <p>Hopefully anybody can confirm...</p>

#2 - 2015-08-10 12:15 PM - Richard Duivenvoorde

Yikes... after a fresh compile/install/restart... all is ok. No crashes anymore.

If anybody is willing to test, feel free, if not just close it..

Hi,

Richard, do you mean QGIS 2.8 or 1.8?

I tried your data between master and 2.8.3 projects and couldn't reproduce a bug. With 2.8, I got a project crash once, the first time I close the project without saving it but I couldn't reproduce it later. Not sure if it's related to the data.

#4 - 2015-08-11 07:26 AM - Richard Duivenvoorde

- Status changed from Open to Closed

Hi, not I really compiled 1.8, but I had crashes with both 1.8, 2.10 and master. If you had no problem I will close this, as I think it was a local library/update problem.

Thanks for checking
