

QGIS Application - Feature request #13228

Display fractions on scale bar

2015-08-18 09:19 AM - Spencer Gardner

Status:	Open	Resolution: Copied to github as #: 21289
Priority:	Normal	
Assignee:		
Category:	Map Composer/Printing	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>There should be an option to display labels on the scale bar as fractions. I often display scales at fractions of a mile, which looks cluttered. Instead of 0.250 the scale should show 1/8 and so on, ideally taking advantage of fractional characters in the source font if available.</p> <p>I'm surprised this hasn't already been raised, but I couldn't see any previous discussion about this in my searching. Apologies if this duplicates another request.</p>
