

QGIS Application - Feature request #13229

Lock the length of Scale bar

2015-08-18 08:41 PM - Adi Kurniawan

Status:	Closed	<div>Resolution: fixed/implemented</div> <div>Copied to github as #: 21290</div>
Priority:	Normal	
Assignee:		
Category:	Map Composer/Printing	
Pull Request or Patch supplied:		
Easy fix?:	No	
<div>Description</div> <div>Dear All,</div> <div>Until this version, I still not find a parameter to set the length of a scale bar. In my expectation, the length scale bar can be controlled by the user, so user has an ability to set the nice view of a scale bar.</div> <div>It's also will be benefit for the user that set the scale bar automatically in the map template.</div> <div>So, if the user will zoom in or zoom out the area, the length of a scale bar not change.</div> <div>Thank you.</div>		

History

#1 - 2015-08-20 01:07 PM - Anita Graser

- Resolution set to fixed/implemented
- Status changed from Open to Closed
- File Screenshot_2015-08-20_22.07.02.png added

This is already implemented in 2.10: use "fit segment width", see attached screenshot
