

QGIS Application - Feature request #13242

Selecting a column in a table to copy it into another column

2015-08-20 02:24 AM - Eric Bardou

Status:	Open	
Priority:	Low	
Assignee:		
Category:	Unknown	
Pull Request or Patch supplied:		Resolution:
Easy fix?:	No	Copied to github as #: 21303
Description		
It is not possible to select a column in an annexe table (or in a table with joins) to copy it and paste it in another column (or better to paste from another application)		

History

- Priority changed from Normal to Low

This can easily be achieved using the field calculator or the quick field calculation bar in top of the attribute table - if I understand correctly what you are trying to do. Could you elaborate why you think it would be useful to have a dedicated "copy column" functionality?
