

QGIS Application - Bug report #13302

long line in legend

2015-08-31 11:12 PM - Denis Rouzaud

Status: Closed	
Priority: High	
Assignee: Vincent Mora	
Category: Map Legend	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch Applied: Yes	Resolution:
Crashes QGIS or corrupts data: No	Copied to github as #: 21360

Description

Recently, I have a weird thing in a legend entry: the line symbol is way too large and I can't see the text if the dock is not large enough:

fix varying line width when legend updates

fix #13302

History

#1 - 2015-08-31 11:14 PM - Denis Rouzaud

this does not happen in the layer properties:

Hi Denis,

I have tried to reproduce with today's master tests/testdata/lines.shp and failed (legend looks OK both in legend panel and composer).

Can you provide a sample project please ?

This is very easy to reproduce. I created a project with tests/testdata/lines.shp and you can watch what is happening in this video:

Ok, reproduced, it's on legend refresh that the size increases. I think I know where the problem is, will fix that asap.

Thanks for the video.
