

QGIS Application - Feature request #13327

Save SVG attributes as classes rather than inline attributes

2015-09-07 06:09 PM - Evan Derickson

Status:	Open	Resolution: Copied to github as #: 21381
Priority:	Normal	
Assignee:		
Category:	Map Composer/Printing	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
Instead of printing attributes to each element in an exported SVG, printing the styles to a class and printing only the class and id attributes to each element would a) result in smaller output file size and b) expedite the subsequent workflow in an SVG or text editor. CSS classes in SVG easily map to layer styles.
