

QGIS Application - Feature request #13333

Export to Adobe Illustrator format

2015-09-08 11:59 PM - Oskar Karlin

Status:	Open	Resolution: Copied to github as #: 21387
Priority:	Normal	
Assignee:		
Category:	Unknown	
Pull Request or Patch supplied:	Not supplied	
Easy fix?:	No	
Description		
<p>One big QGIS dream would be to have an Illustrator (AI) file export from QGIS (like the one in ArcGIS) where text stay as text and layers stays as layers. That would be so awesome. Also CMYK support would be superb!</p>

AI files are (I think) closed files. I created SimpleSVG plugin some time ago to be able to export not too complex to svg for further editing in Inkscape. You could use that?

I keep the layers separated in (Inkscape) groups, and put the labels in a separate layer if I'm correct...

You could have a look into that one first.
